Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 31-35, drawn to a high performance tire whose tread underlayer has substantially constant hardness between 23°C and 100°C, classified in class 152, subclass 209.5.
 - II. Claims 36-40, drawn to a high performance tire whose tread underlayer has substantially constant elastic modulus between 70°C and 100°C, classified in class 152, subclass 209.5.
 - III. Claims 41-53, drawn to a high performance tire whose tread underlayer is made from an elastomer compound comprising reinforcing fibers and hardening resins, classified in class 152, subclass 209.5.
 - IV. Claim 54, drawn to a high performance tire whose tread underlayer has both substantially constant hardness between 23°C and 100°C and substantially constant elastic modulus between 70°C and 100°C, classified in class 152, subclass 209.5.
 - V. Claims 55-60, drawn to a method for improving behavior at high speeds of a high performance tire, classified in class 156, subclass 128.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a high

Application/Control Number: 10/038,622

Art Unit: 1733

performance tire without the particular tread underlayer of Invention II or Invention III. See MPEP § 806.05(d).

- 3. Inventions IV and I-II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because there is evidence (independent claims 31 and 36) that the particulars of neither subcombination alone is the sole basis for patentability of the combination. The subcombination has separate utility such as a high performance tire without the particular tread underlayer of Invention I or without the particular tread underlayer of Invention II.
- 4. Inventions V and I-IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as one in which the tread underlayer is applied on the radially-external layer and then the external tread layer is applied on the tread underlayer.
- 5. Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as a high performance tire without the particular tread underlayer of Invention III. See MPEP § 806.05(d).

Art Unit 1733

- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 8. A telephone call was made to Lawrence Galvin on July 24, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adrienne C. Johnstone whose telephone number is (703)308-2059. The examiner can normally be reached on Monday-Friday, 10:00AM-6:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on (703)308-2058. The fax phone numbers for the organization where this application or proceeding is assigned are (703)872-9311 for regular communications and (703)872-9310 for After Final communications.

Application/Control Number: 10/038,622

Art Unit: 1733

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-0661.
